Mr. Terry Carty
Roots, Shoots & Fruits Ltd
PO Box 72
Waiheke Island
Auckland NZ

Dear Terry,

I would like to congratulate your company on a very good product. We recently incorporated Superzyme™ into our field nursery of mixed stone fruit after an explanation of the product from the local rep.

We used it as a planting dip on your advice, the nursery ground was ex apple ground and we have found it to be most beneficial. The trees have done extremely well, they are strong healthy trees well calloused buds, with a huge increase in growth when compared to untreated control areas, there are very few misses nor any sign of damping off diseases.

Possibly the best part of the treated area is the consistency of the trees; they are all premium quality stocks when compared to the untreated control which shows inconsistent stocks, some inconsistency would be expected in the first year of a new nursery.

We are keen to investigate other products that your company supplies on the basis of this trial. We at L.E .Cooke Nurseryman Ltd feel confident with the use of Superzyme™ and other JH Biotech Inc. products we will continue to supply premium quality trees to the industry and this will be a win win situation for all concerned to the betterment of the industry.

Yours faithfully

Martin Cooke
