**Subject:** Biomin copper endorsement

Hi Paula,

On our orchards in the Waikato we have used Biomin Copper for the last three years in Autumn.

We use Biomin Copper to help speed up leaf defoliation so we can treat more leaf scars at once in our fight against European canker.

Since using Biomin Copper in our canker programmes we are seeing the benefits at spring time with the new shoots looking a lot healthier and reduced signs of canker damage across all of our orchards.

Regards Ken Johnson

Waikato Area Manager.
